

We at Katha are using tech as a lever to spread the joy of reading through its visual storytelling app. We are looking for an Application Developer to develop Katha's e-kit, as a part of [Katha Digital Lab](#), and help us digitizing our initiative-

JD for App Developer (Part-time/ Freelance):

We currently require an experienced Android/iOS/Cross-platform mobile applications developer to build and maintain web and mobile based applications targeted for mobile devices. The successful candidate will assist in the development, deployment and maintenance of several enterprise mobile applications built using open source toolsets and technologies. The candidate is expected to develop, test, deploy and maintain the application. The specific tasks to be accomplished are:

- Plan, architect, integrate, and develop intuitive and user friendly cross platform applications targeting mobile devices.
- Develop decoupled, interactive web/mobile UIs
- Perform cross-browser/device testing and optimization
- Develop well documented code that is cross-browser and cross-platform friendly with emphasis on responsive design.
- Deploy mobile applications to internal Enterprise App stores (Android, iOS.)
- Support, maintenance and ongoing development for existing applications and projects.
- Create technical documentation to accurately represent the application design and code.

Qualifications:

- Experience with Android and/or iOS software development (phone and tablet) using Android and/or iOS or cross platform SDKs.
- Working knowledge and experience with Java or Python.
- Working knowledge and experience with HTML, CSS and JavaScript.
- Experience using libraries and frameworks like: Angular, Backbone, Ember, React, JQuery a plus.

How to Apply:

Interested applicants are requested to submit their updated CV along with a cover letter to hr@katha.org with the title 'App Developer' in the subject line. Applications accepted till 15 December 2017.
