

We at Katha are using tech as a lever to spread the joy of reading through its visual storytelling app. We are looking for an Application Developer to develop Katha's e-kit, as a part of [Katha Digital Lab](#), and help us digitizing our initiative-

JD for Front-End Development Intern:

We currently require a front-end developer to create interactive and responsive ebooks that are targeted for mobile devices. The successful candidate will assist in the development and maintenance of the ebook built using open source toolsets and technologies. The specific tasks to be accomplished are:

- Develop highly interactive ebooks that are compatible for tablets, eBook readers, smart phones, and desktops.
- Integrate text, graphics, animation, audio and interaction that would be provided by Katha's tech team into a high-fidelity ePUB.
- Create technical documentation to accurately represent the application design and code.

Qualifications:

- Well-versed with instructional designing and experience with front-end development for phone, desktop and tablet.
- Working knowledge and experience with HTML5, CSS and JavaScript.
- Experience using libraries and frameworks like: Angular, Backbone, Ember, React, JQuery a plus.

Duration: 1-2 months

How to Apply:

Interested applicants are requested to submit their updated CV along with a cover letter to communications@katha.org with the title 'Front-End Development Intern' in the subject line. Applications accepted till 15 December 2017.
